Recommendation: To enhance Botium Toys' security posture and protect sensitive information, several security controls should be implemented. Key measures include enforcing least privilege access, developing a disaster recovery plan, applying strong password policies, maintaining separation of duties, deploying an intrusion detection system (IDS), managing legacy systems, encrypting sensitive data, and utilizing a password management system.

To address compliance gaps, Botium Toys should prioritize controls such as least privilege access, separation of duties, and data encryption. Furthermore, the company should effectively classify assets to identify and apply additional necessary controls, thereby strengthening security and safeguarding sensitive information.
